

## Setting new standards in secondary packaging equipment

Through application and integration excellence

Langen Group has deep roots in both Canada and the Netherlands, together with a heritage of excellence that goes back almost 60 years. Our founding companies specialized in packaging equipment, and we have now evolved into leading providers of advanced packaging equipment and packaging integration.

## Heritage

- 2013** Langen Packaging Group expands its global presence by opening offices in Singapore and Bangkok. The business changes its name to Langen Group.
- 2008** Langen Packaging Group is created to bring together the businesses of Langenpac B.V. and Langen Packaging Inc.
- 2004** Successful introduction of the high speed 5-head rotary feeder after subsequently introducing the 3-head rotary feeder in 1995, and rotary feeder in 1976.
- 1996** Molins PLC acquires Langen Packaging Inc. (Canada) and Langenpac B.V. (The Netherlands).
- 1990** Introduction of the first robotic secondary packaging system.
- 1988** Langenpac N.V. is founded in Wijchen, The Netherlands.
- 1958** Introduction of the B1-M™. The first manual load cartoning machine. Since 1958 the B1-M™ has evolved to the latest technology standards but is still one of the best-selling machines of Langen Group.
- 1956** H.J. Langen & Sons is founded in Mississauga, Canada.

## We are LANGEN Group

We are one of the world's most innovative suppliers of secondary packaging and product handling equipment. Working in partnership with our customers, we enable their brands to stand out:

- On the shelf, through high quality, effective and eye-catching packaging
- Through operational efficiency, production flexibility and optimized performance
- In applications, by delivering advanced solutions for a wide range of packaging needs

We are part of Molins PLC, an international specialist technology and services group, providing high performance instrumentation, machinery and analytical services.

We focus on excellence in everything we do. We define excellence as working together in flexible, expert teams, coordinating all necessary resources in open partnerships to deliver superior performance.

The Langen Group, part of Molins PLC (LSE: MLIN), develops, manufactures and markets end-of-line packaging and product handling solutions from cartoning through to palletizing. We specialize in high speed, high quality equipment for business critical FMCG applications such as food, pharmaceuticals, personal care, and beverages. The Langen Group operates world-wide and has an installed base of over 4,000 machines.

## Focus on application and integration excellence

Langen Group takes a strategic approach to application excellence. We focus on secondary and downstream packaging applications carefully selected to match our expertise in handling complexity, speed and other special requirements, such as operational flexibility. Our portfolio of specialized solutions evolves continuously through constant innovation and investment. Our aim is to stay ahead of competition, exceed customer expectations and always deliver solutions that help customers achieve a competitive advantage. Our portfolio includes proven solutions for applications such as:

- Confectionery bars
- Stick packs
- Bags
- Pouches
- Bottles
- Facial tissues

Langen Group also delivers true integration excellence, based on our own in-depth understanding of complex product handling. We are expert in the full production and packaging value chain. That enables us to integrate key activities and deliver to customers from a single point of contact and responsibility, covering everything from primary packaging to palletizing.

## Industry experience

Over almost 60 years Langen Group has developed outstanding levels of experience, knowledge and expertise in a wide range of industries. Our deep industry knowledge enables us to work as effective partners to customers in many sectors.

We recognize that packaging equipment must be designed to carry out complex and frequently changing tasks. Secondary packaging also has to meet increasingly tough performance standards, including increased shelf quality, safety, and documentation requirements. Today, hygienic secondary packaging is an emerging hot topic and here, as well, Langen Group is innovating and setting new standards. Our products help customers to perform at their best and meet all new regulations. Our high speed secondary packaging equipment is found in a range of industries including food, pharmaceutical, beverage, and consumer products.

In almost every household on every continent you most probably can find products packaged with our equipment.

## A complete portfolio

We have developed a range of equipment suited to the secondary packaging needs of our customers. The equipment is designed according to the latest hygienic standards with a heritage in complex product handling.

- Infeed & collation systems. We offer a wide range of systems used to collect products from primary packaging equipment, collate those products, and feed them into our cartoning equipment.
- Cartoning equipment. The heart of our business. From high quality manual load to high speed fully automated cartoning equipment we offer packaging solutions that could range from 300 luxury bottles of spirits to more than 2000 stick packs per minute.
- Casepacking & palletizing. To complete packaging lines we offer fully automated case packers and palletizing equipment for complex product handling.
